AFESA Outreach Sub-Committee Spotlight / *MEMBER-AT-LARGE*

MARGARITA ENCINAS	*Records Management System (RMS) Analyst* *Queen Creek Fire and Medical (AZ)*

Bio

I joined the Queen Creek Fire and Medical Department as a Records Management System Analyst in April 2025. Prior to joining the Fire and Medical field, I worked 9 years in Law Enforcement where part of that experience was served as a Crime Intelligence Analyst for the Chandler Police Department and as a Data Analyst for LexisNexis Special Investigations Unit.

My proudest accomplishment is

bringing forward new innovative techniques of analyzing data resulting in justice and crime prevention, while continuing to improve analytical methods for the Fire and Medical field while wearing my jack-of-all trades cap serving other responsibilities.

I found my way to AFESA

I was researching different analytical approaches to better aid my agency and building connections with other Fire and Medical analysts through LinkedIn when I saw a post about AFESA.

Goal for AFESA

My goal for AFESA is to further provide awareness that AFESA is here for other Fire and Medical personnel. I strive to build the connections and to work together as a Team, since this is a National to even International effort in continuing to further aid the community that the Fire and Medical field serves with the mentality of 'Service Above Self'.
